Microalgae production for high added value compounds is identified as a business sector with high growth potential in the near future, especially in the Atlantic Area.

The **EnhanceMicroAlgae** project aims to facilitate the development of industrial and business opportunities in the microalgae sector within the Atlantic regions of Ireland, UK, France, Spain and Portugal.

- 11:45: 12:15 Practical aspects of micro-algae exploitation and commercialization: the entrepreneur perspective
- 12:15: 13:00 Making business out of micro-algae: a hands-on exercise

Microalgae Strain Catalogue

The University of Manchester team have compiled a Microalgae Strain Catalogue containing information on a large variety of strains. The catalogue is part of the deliverables from WP7, led by Swansea University, and includes a wealth of material on strain cultivation,

composition, and characteristics. This will be maintained
